### PLANNING INFORMATION

- The convection steam oven can be installed in a standard or flush inset application. The electrical supply for the oven must be located in an adjacent cabinet.
- Finish the edges of the opening. They may be visible when the door is open.
- For standard installations, face trim will overlap stiles and rails. Refer to the chart below.
- For Flush inset installations, a minimum 3 mm reveal is required on all sides.
- To ensure consistent reveals, each corner of the opening must be exactly 90°.

### ELECTRICAL

- Installation must comply with all applicable electrical codes and be properly grounded (earthed).
- Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit, servicing only this appliance is required.
- A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.
- Performance may be compromised if the electrical supply is less than 220 volts.
