# 1000 W

THE NEXT GENERATION  
WOOD STOVE

---

**With three large ovens and a huge cast iron hotplate, this clever stove caters for all tastes.**

The fourth door houses the glass fronted firebox; so you can check on your fire easily and add fuel without fuss. Fuelled by logs up to 360mm long, when loaded up before bedtime the dependable 1000 W will still be radiating warmth at breakfast.

Opening the firebox door on the left reveals a window through which you can gaze upon your fire that generates enough warmth to heat a room up to 60m<sup>2</sup>.

The three true cooking ovens and large cast iron dog bone hotplate are all powered by the firebox.

The left of the hotplate directly above the fire can reach temperatures of up to 400°C. Simply slide your pans over to the right hand side of the hotplate to reduce temperatures from a rolling boil, across a steady simmer, to a gentle melt.

ESSE's deep, heat-retaining ovens provide a stable and even temperature, so dishes don't need to be turned during cooking.

With optional hot water, this is the wood stove for any home.
