

CUBE ICE MAKER IM-45CNE

The IM-45CNE is a self contained undercounter cube ice maker. It is suited for placement under bars and food servicing countertops. This model maintains low levels of water- and energy consumption.

- Unique ice making system that has an automatic rinse cycle. After every new batch of ice, the water reservoir drains and refills with fresh water.
 - System comes with a magnetic water pump that has no direct coupling, which prevents any leakage.
 - Closed water circuit offers the ultimate contamination protection, by reducing the number of points at which impurities can enter the ice making process.
- Electronically controlled to ensure an optimised ice making process under varying circumstances without the need for physical adjustments. Quality of ice is always consistent.
 - Easily cleanable air filter allows end-users to carry out routine cleaning schedules. Extends product life expectancy and reduces the frequency and costs of maintenance call-outs.
