Bio Presh A++ Infinity Infinity Soft Soft Soft Swart Super Cool Cooling

Optional accessories

- Flat brushed aluminium handle
- Square brushed aluminium handle
- Round stainless steel handle
- Stainless steel panel
- Plinth panel made of stainless steel
- Side-by-Side set
- Door hinge exchange set

Optional accessories on page 38-39.

Appliance dimensions

The adjustable feet are fully retracted for the minimum height stated. The appliance height is raised by turning the adjustable feet. Once the appliance has been positioned in the recess, it is raised using the adjustable feet - in each case from the front of the appliance - so that the appliance comes into contact with the anti-tipping device. To achieve the minimum plinth panel height of 102 mm, the adjustable feet have to be lifted up to 6-8 mm. If the plinth panel should be higher than 102 mm, the adjustable feet can be raised by a maximum of 26 mm.

Recess dimensions

Individual plinth panel

2134 mm

Continuous plinth panel

with overlay door panel installation: 635 mm with inset door panel installation: 635 mm + thickness of

Point at which the mains cable exits from the rear of the appliance (19 mm from the left and 127 mm from the floor). The free length of the mains cable is 2.5 m.

The appliance has a recess in this area for cable and water line routing: Depth is 25 mm, and height 140 mm across the entire appliance width.

This surface is visible when the appliance door is opened. Designed finish is therefore recommended.

The anti-tipping device positioned at the base of the appliance must be secured to the floor or to the wall.

Door panel dimensions

and dimensions of free length for power

Inset installation

H = 2029 mm W = 603 mm

Overlay installation

(plus the dimensions of overlapping of the panel on

W = 610 mm

(plus the dimensions of overlapping of the panel on

Thickness of the panel: min. 16 mm* / max. 30 mm Weight of panel: max. 30 kg

Installations behind the appliance are not possible.

^{*} If a five-piece shaker style panel is used, which is thinner than the minimum panel thickness, shorter screws than those supplied in the accessory pack must be used. For further relevant planning and safety requirements see pages 40-47.
